Produced by the Australian Government Publishing Service

PREFACE

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data.

Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

This issue includes a special article entitled *South Australian Agriculture*. Future issues will contain further articles on statistical topics which concentrate on longer term trends or other issues pertinent to the South Australian economy.

If you have any inquiries concerning this publication please contact the editor, John Callinan, telephone (08) 237 7307. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272, Adelaide SA 5001, telephone (08) 237 7100.

REVIEW

Overview

- The value of merchandise exports for March 1996 were \$462.8 million continuing the strong growth over the past four months.
- The value of merchandise imports for March 1996 were \$242.6 million, a decrease of 4.5% on the previous month and 18.1% on March 1995.
- The trend estimate of retail turnover decreased by 0.6% in March 1996, continuing the decline in the trend estimate since October 1995.
- The trend estimate for new motor vehicle registrations in April 1996 increased 1.0%.
- The March 1996 trend for the total number of dwelling units approved in South Australia fell 3.4%.
- Non-residential building approvals in March 1996 were valued at \$49.9 million and contributed 6.6% to the Australian total.
- The Price Index of Materials used in House Building increased by 0.2% in Adelaide for March 1996.
- Adelaide recorded a rise of 0.3% in the Price Index of Materials used in Building other than House Building for March 1996.
- The trend estimate of employed persons has been increasing since January 1996.
- The trend unemployment rate has decreased from 9.9% in April 1995 to 9.5% in April 1996.
- There were 3,900 working days lost through industrial disputes in South Australia in February 1996.
- Between November 1995 and February 1996, the trend estimate of average weekly total earnings of all employees in South Australia increased 0.9%.
- The trend estimate for the value of owner-occupied housing commitments for March 1996 was \$258.3 million, up 0.2%.
- Commercial finance commitments increased by 21.3% to \$542.9 million when compared with February, 26.1% higher than March 1995.

State Accounts

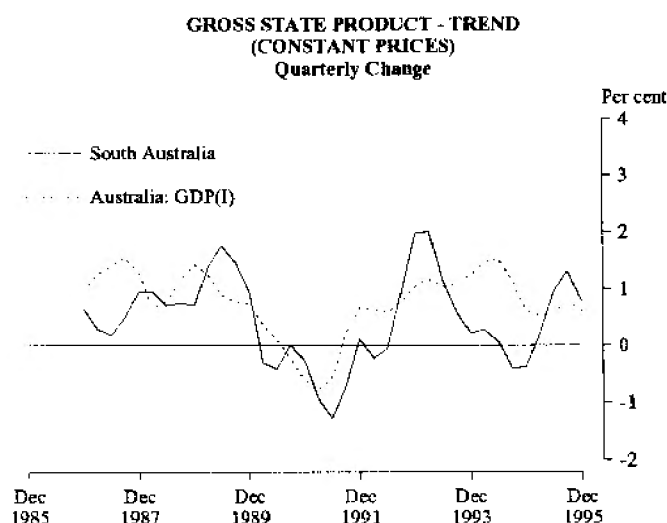

NOTE: Deficiencies in the data sources used to estimate gross operating surplus for recent quarters may at times lead to the current price estimates of Gross State Product(I) being under or over stated for particular States. Consequently, the measured growth rate for constant price GSP(I) for those States will also be affected.

The constant price series for Gross State Product (GSP) have been labelled as 'experimental'. Users are cautioned that these estimates are derived indirectly by calculating a deflator from the expenditure components. It is emphasised that, at times, movements that can not be fully explained may be introduced into the constant price GSP(I) series through the use of this proxy deflator.

Trend Estimates (Current Prices) The gross state product (GSP) grew 1.5% in the December quarter 1995 compared with the national average of 1.3%. This is the second consecutive quarter in which GSP has exceeded the national rate.

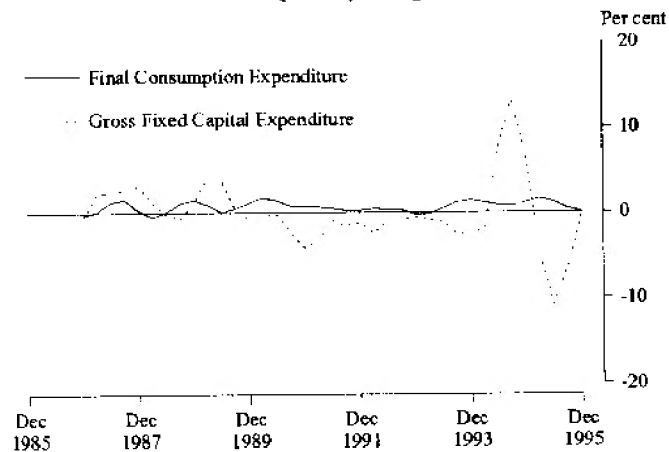

Growth in both gross operating surplus (up 1.6%) and indirect taxes less subsidies (up 1.2%) exceeded the national average. The growth in wages, salaries and supplements (up 1.4%) has been below the national average since the December quarter 1993.

Trend Estimates (Constant Prices) The experimental GSP at constant prices grew 0.8% in the December quarter, 3.3% above that of the December quarter 1994.

State final demand showed no change in the December quarter compared with a national increase of 0.5%. Only Queensland (-0.1%) recorded lower growth.

**STATE FINAL DEMAND - TREND
(CONSTANT PRICES)
Quarterly Change**

For the third consecutive quarter, the rate of increase in private final consumption expenditure slowed with the 0.7% increase in the December quarter being considerably below the strong growth of 1.7% experienced in the March quarter 1995.

Public final consumption expenditure declined 2.3% in December.

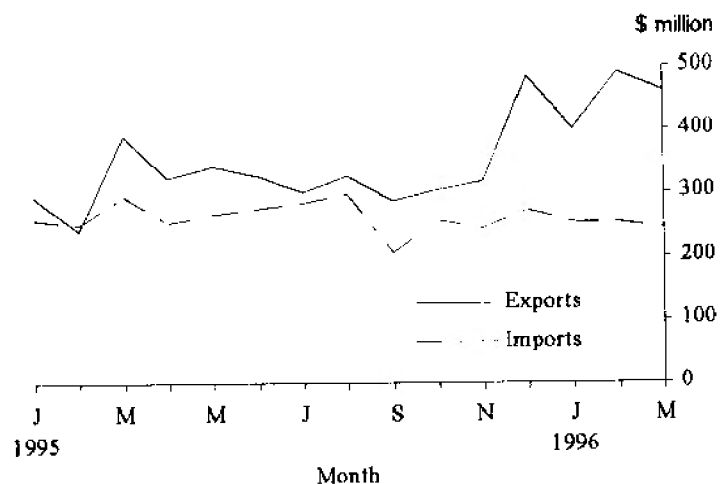

Private gross fixed capital expenditure increased by 0.6% in December, the first quarterly increase since the December quarter 1994. Increases in expenditure on equipment and non-dwelling construction more than offset the decline in expenditure on dwellings.

International Accounts

Exports

In March 1996 the total value of merchandise exports was \$462.8 million. This compares with a total value of \$491.0 million in the previous month and \$390.9 in March 1995. The past four months has seen exports around \$400 million and can be linked to the increase in agricultural industry exports which accounted for 35.8% of total exports. Exports to China have increased considerably in the past two months.

MERCHANDISE EXPORTS AND IMPORTS

Imports

The value of merchandise imports for March 1996 were \$242.6 million, a decrease of 4.5% on the previous month and 18.1% on March 1995.

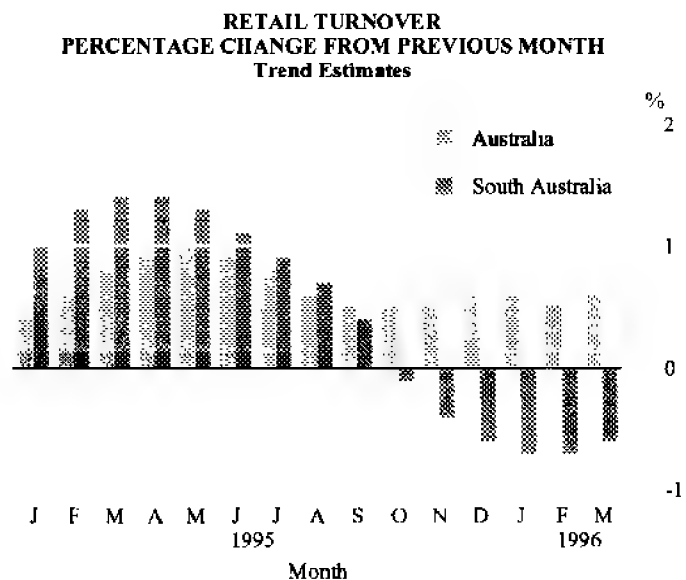

Consumption and Investment

Retail Turnover

The trend estimate of retail turnover in South Australia decreased by 0.6% in March 1996, continuing the decline in the trend estimate since October. The trend estimate for Australia increased by 0.6%.

Over the past three months the trend estimate for South Australia has declined by \$14.6 million caused by the decreases of \$12.3 million in hospitality and services group, \$7.4 million in the food retailing group, \$0.7 million in clothing and soft goods retailing and \$0.3 million in recreational good retailing. This was partly offset by increases of \$2.9 million in household good retailing, \$2.2 million in other retailing and \$1.0 million in department stores retailing group.

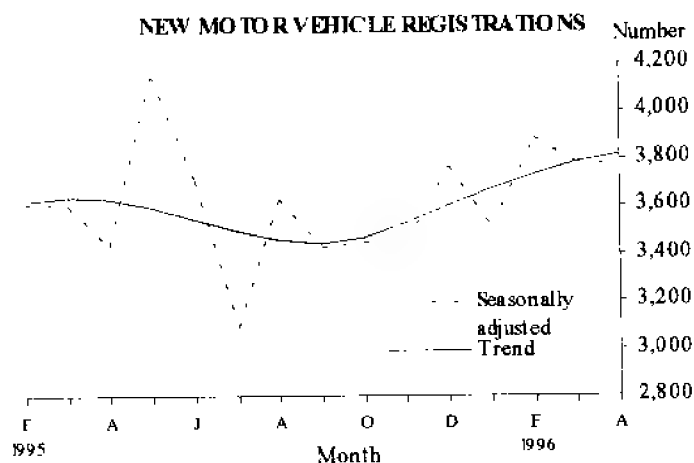

The seasonally adjusted estimate of retail trade in March 1996 increased by 0.5%. In original terms, retail turnover was \$737.3 million, an increase of 2.1% on March 1995.

New Motor Vehicle Registrations

The South Australian trend estimate for new motor vehicle registrations in April 1996 increased 1.0%. The trend estimate has been increasing since October 1995, but the rate of increase is slowing. The seasonally adjusted estimate for April 1996 decreased by 0.2% from March 1996 and increased by 9.9% from April 1995.

In original terms there were 3,292 new motor vehicles registered in April 1996, a decrease of 14.9% from March 1996 and an increase of 18.2% on April 1995. For new passenger vehicles, the leading makes registered in April 1996 were Holden (858 vehicles), Ford (513), Toyota (368), Mitsubishi (341) and Hyundai (143).

Tourist Accommodation

When the December quarter 1995 is compared with the December quarter 1994, caravan parks capacity increased by 0.3% from 24,341 to 24,406 powered and unpowered sites, on-site vans and cabins. The number of site nights occupied increased slightly from 610,224 to 610,646 while the site occupancy rate remained unchanged at 27.2%. Accommodation takings rose by 6.0%, from \$7.2 million to \$7.6 million, with the average takings per site night occupied increasing from \$11.80 to \$12.50.

Private New Capital Expenditure

The trend estimate (in current prices) for private new capital expenditure in South Australia for the December quarter 1995 was \$451 million. The increase of 3.2% from the previous quarter is a reversal of trend decline which commenced in March quarter 1995. The increase in figures for South Australia was higher than for any other State with the Australian figure rising by 0.6%. The South Australian total for the quarter now represents 5.0% of the Australian figure.

Private new capital expenditure in original terms for the December quarter 1995 was \$536 million, an increase of 49.2% from the September quarter 1995. Buildings and structures accounted for \$87 million, and equipment, plant and machinery \$449 million. Expenditure for the 1995 year fell by 5.3% from 1994 with the Australian figure rising by 12.7%.

Production

Dwelling Approvals

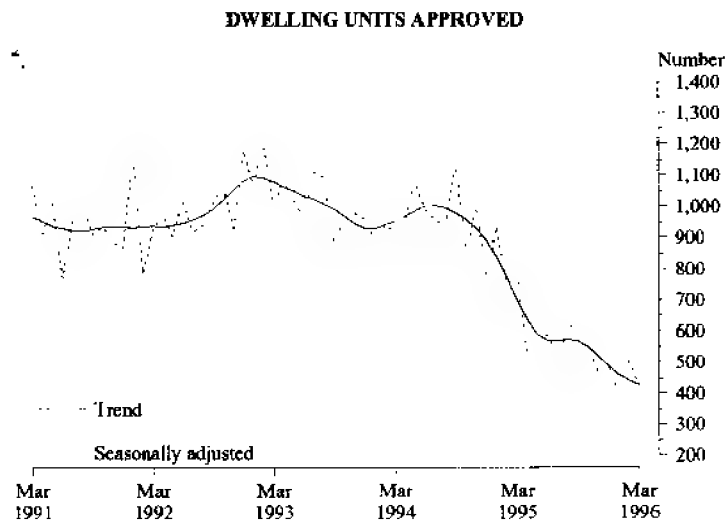

The March 1996 trend for the total number of dwelling units approved in South Australia fell 3.4%. This follows declines of 4.1% in February and 5.1% in January. The March 1996 figure was 38.6% lower than for March 1995.

The trend for the number of private sector houses approved increased by 0.3%. This follows falls of 0.8% in February and 1.8% in January 1996.

In South Australia the number of dwelling units approved in original (un-adjusted) terms was 437 for March 1996, a 10.1% decrease on the previous month and a fall of 52.1% from the same period the previous year (913).

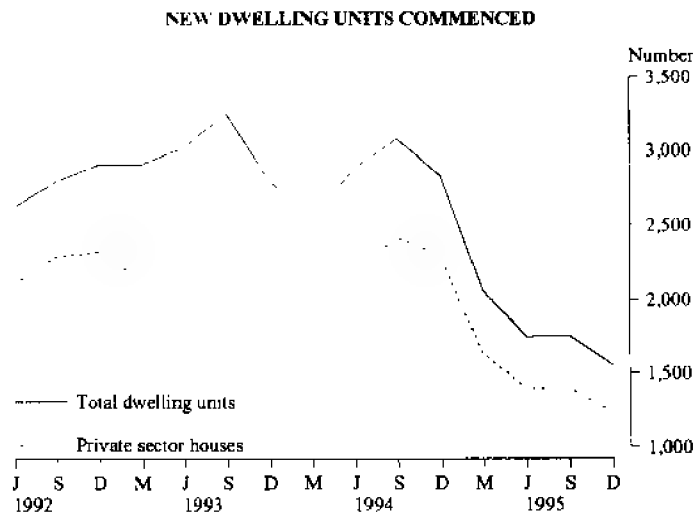

Nationally the trend for the total number of dwelling units approved increased 0.2% in March 1996 to 10,217. This follows an increase of 0.3% in February, but was 19.8% lower than the March 1995 estimate (12,740).

In original terms, the total number of dwelling units approved nationally was 10,163, an increase of 0.5% from 10,109 in February 1996 but 24.7% lower than March 1995 (13,501). South Australia accounted for 4.3% of the March 1996 figure.

Dwelling Commencements

The number of new dwelling units commenced in South Australia continued to fall during the December quarter 1995. It was down 11.5% to 1,557. This compares with a fall of 10.8% nationally. There was a decrease of 45.1% in South Australia and 34.2% nationally when compared with the December quarter 1994. Expressed as a proportion of the national total, the number of commencements in South Australia was 5.2% compared with 5.2% last quarter and 6.2% for the December quarter 1994.

Value of Non-residential Building Approvals

In March 1996, the value of non-residential building projects approved in South Australia rose to \$49.9 million after having previously fallen to a thirty one month low of \$16.5 million in February 1996.

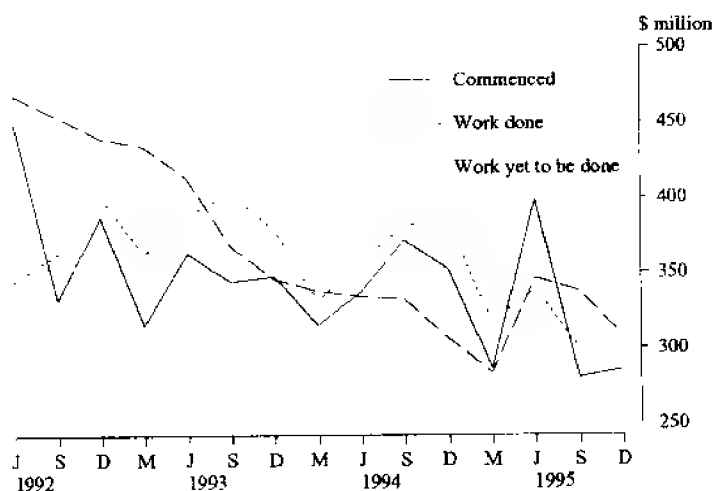

South Australia contributed 6.6% towards the total value of Australian non-residential building approvals of \$758.8 million.

Value of Total Building Activity

The total value of building work commenced in South Australia during the December quarter 1995 rose 1.9% from the previous quarter to \$285.8 million. Compared with the December quarter 1994, South Australia had an 18.9% decrease in building commencements while the corresponding national movement was a 17.2% decrease. The South Australian share of the national total of building commencements was 4.8% for the December quarter.

The total value of building work done during the December quarter 1995 rose 9.2% to \$327.1 million compared with a decrease of 2.4% nationally. Compared with the December quarter 1994, South Australia had a 15.0% decrease in the value of total building work done while the corresponding national movement was a 6.8% decrease.

VALUE OF BUILDING ACTIVITY

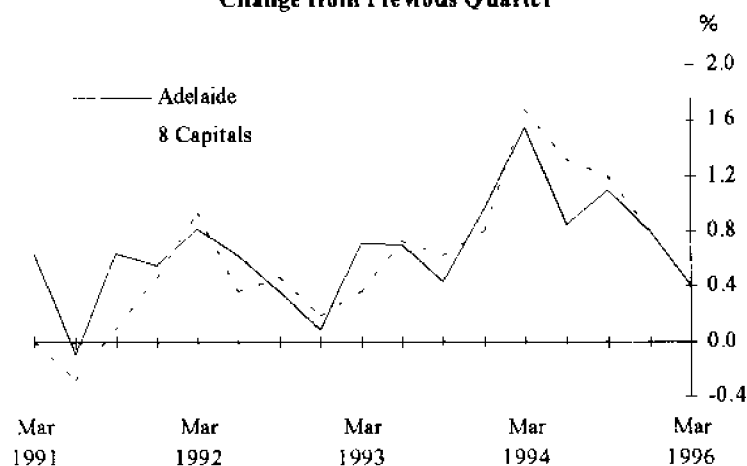

Value of Engineering Construction

In the December quarter 1995 the value of engineering construction work done in South Australia rose by 19.8% (16.0% nationally) to \$169.5 million. South Australia had a 4.5% share of the national total. The value of work commenced during the quarter rose by 6.0% to \$144.0 million compared with a national decrease of 41.7%. The State's proportion of national commencements was 4.9%.

Consumer Price Index

For the March quarter 1996 the Consumer Price Index (all groups) increase of 0.4% for Adelaide was the same as the average for the eight capital cities. The annual increase for Adelaide was 3.2% while nationally the Consumer Price Index increased 3.7%.

CONSUMER PRICE INDEX Change from Previous Quarter

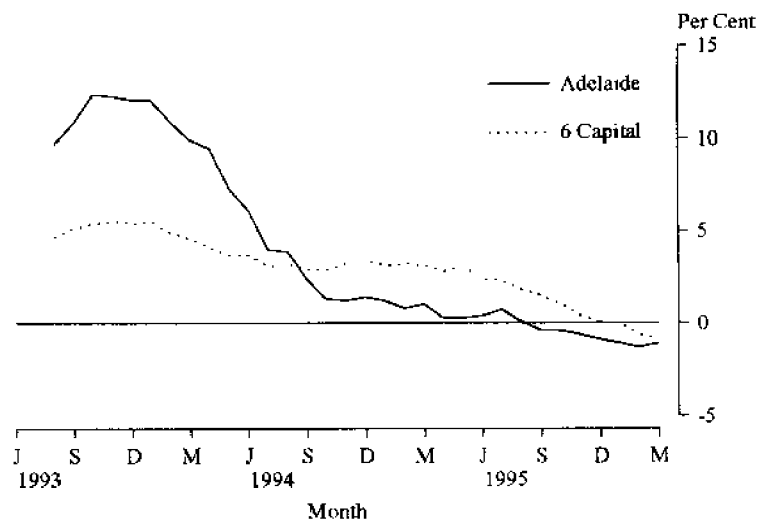

House Building Materials

Adelaide recorded a 0.2% increase in the Price Index of Materials Used in House Building for the month of March 1996. A price increase for ready mixed concrete was the main contributor to the rise in the Index. The weighted average of the six State capital cities fell by 0.2%.

In the twelve months to March 1996, the Adelaide Index decreased by 1.1% compared with a decrease of 0.9% in the weighted average of the six State capital cities.

MATERIALS USED IN HOUSE BUILDING Change from Same Period of Previous Year

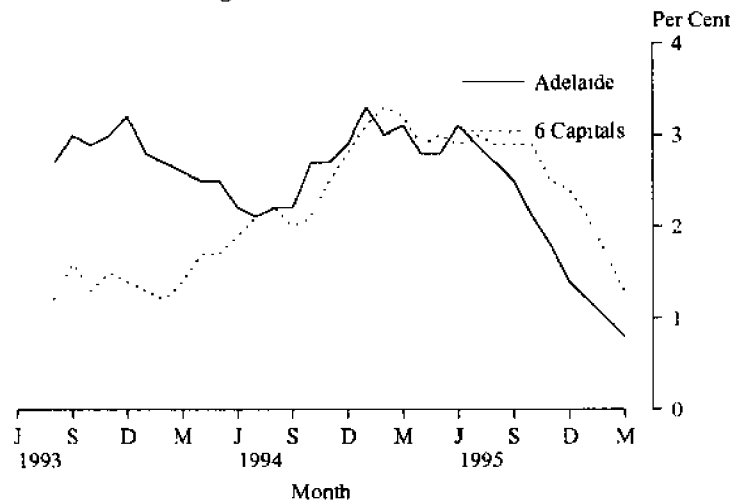

Non-house Building Materials

There was a rise of 0.3% in the Price Index of Materials Used in Building Other than House Building during March 1996. Price increases in ready mixed concrete, structural steel and elevators were the main contributors to the rise. The weighted average of the six State capital cities fell by 0.1%.

Over the past twelve months the Index has increased by 0.8% in Adelaide (the lowest of the six State capital cities). The weighted average of the six State capital cities increased by 1.3% for the same period.

**MATERIALS USED IN BUILDING
OTHER THAN HOUSE BUILDING**
Change from Same Period of Previous Year

House Prices

The price index of established houses and project homes in Adelaide fell 2.3% and 0.4% respectively during December quarter 1995. Nationally, over the same period prices for both established houses and project homes fell by 0.2%.

In Adelaide over the twelve months to December quarter 1995, there was a price decrease of 3.0% for established houses and a decrease of 2.0% for project homes. Nationally, for the twelve month period, established house prices recorded a 0.3% increase while project homes rose by 1.0%.

Labour Force and Demography

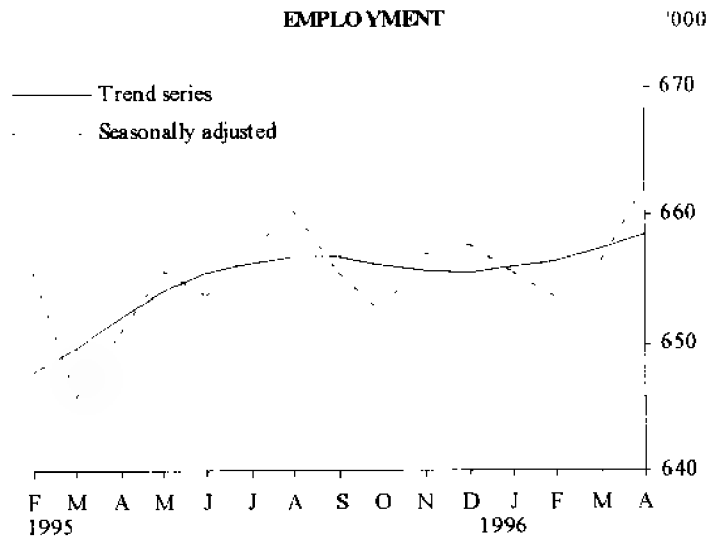

Population

At 30 September 1995 the estimated resident population of South Australia was 1,474,674. This was an increase of 0.05% (708) persons from the June quarter, which was below the national increase of 0.3%. The continuing low growth rate for South Australia is attributable to a large net outflow in interstate migration of 2,157 persons which was offset by a net inflow of overseas migration of 1,106 persons and a natural increase of 1,759. The quarterly interstate migration loss was the highest recorded from South Australia.

Employment

The trend estimate of employed persons in South Australia has been increasing since January 1996, following a slight decline in the last three months of 1995. The April 1996 estimate (658,400) is 1.0% higher than the level of twelve months ago.

In April 1996, the trend estimate of employed persons in Australia was 8,304,600. This was 1.2% higher than the level of twelve months ago. Over the past year, full-time and part-time employment have increased by 1.2% and 1.1% respectively.

Unemployment

The trend unemployment rate has decreased from 9.9% in April 1995 to 9.5% in April 1996. Over the same period, the trend unemployment rate for males has decreased from 10.8% to 10.4%, while the rate for females has decreased from 8.7% to 8.4%.

After remaining flat for the nine months to January 1996, the trend estimate of the unemployment rate in Australia has increased to 8.6% in April 1996.

Overtime

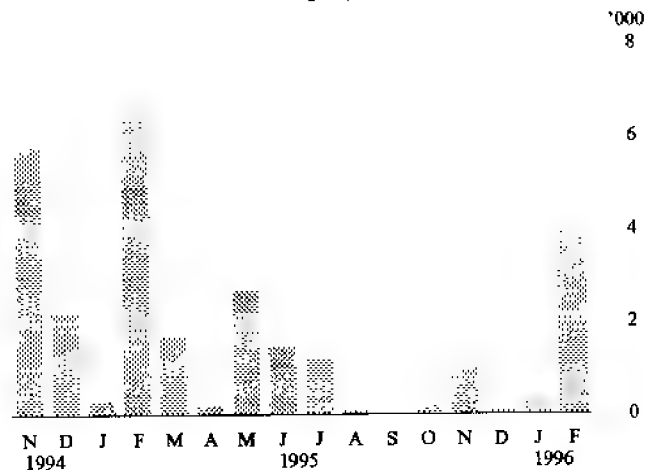

The proportion of employees who worked overtime in South Australia in February 1996 was 13.8%, compared with 16.3% in February 1995.

Industrial Disputes

There were 3,900 working days lost through industrial disputes in South Australia during February 1996. This was the highest monthly figure since February 1995 when there were 6,400 working days lost.

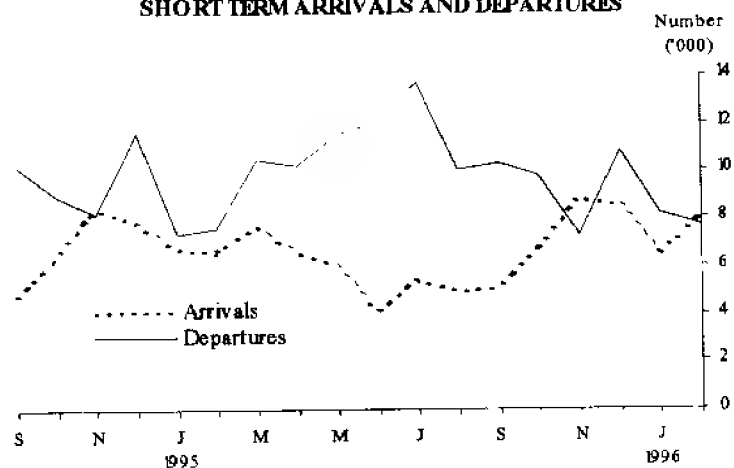

In the 12 months to February 1996, 12,800 working days were lost due to industrial disputes in South Australia. This was 4.7% of the national total and was the lowest percentage of all the mainland States.

INDUSTRIAL DISPUTES Working Days Lost

Short term Overseas Visitor Arrivals The estimated number of short term overseas arrivals staying in South Australia in February was 7,980. This brings the total number of overseas visitors during the eight month period July 1995 to February 1996 to 53,890, a decrease of 7.0% during the corresponding eight month period to February 1995(57,939). The South Australian share of the Australian total for February 1996 was 2.0%.

SHORT TERM ARRIVALS AND DEPARTURES

Short term Resident Departures

During February 1996 the number of short term departures of South Australian residents was 7,668, a 5.9% decrease over the preceding month but a 1.3% increase on February 1995.

Incomes

Average Weekly Earnings

The trend estimate of average weekly ordinary time earnings of full-time adult employees in South Australia increased from \$617.50 in November 1995 to \$623.10 in February 1996. Male full-time ordinary time earnings rose from \$646.70 in November 1995 to \$656.50 in February 1996. Over the same period, the comparable level for females decreased from \$555.70 to \$553.90.

Between November 1995 and February 1996, the trend estimate of average weekly total earnings of all employees in South Australia increased from \$515.10 to \$517.90.

Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

Award Rates of Pay

Over the twelve months to March 1996, the weekly award rates of pay index for full-time employees in South Australia increased by 1.5%.

For full-time adult male employees, the largest annual movement of the index occurred in the electricity, gas and water supply industry division, with an increase of 3.6 %.

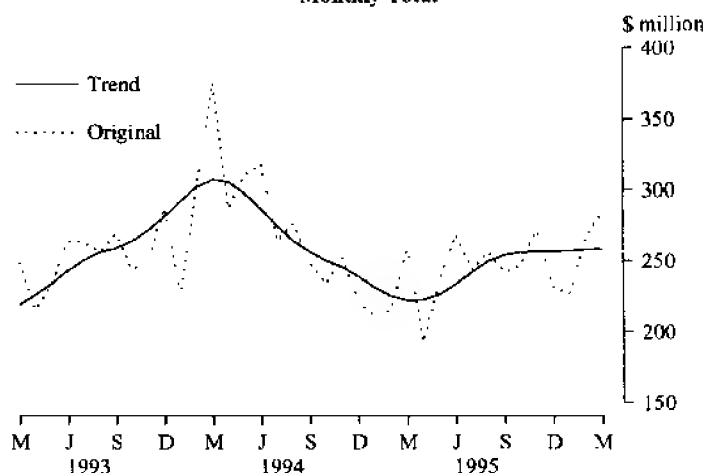

For full-time adult female employees, the largest annual movements of the index occurred in the finance, property and business services industry, with an increase of 1.9%.

Financial Markets

Housing Finance

The trend estimate for the value of owner-occupied housing commitments for March was \$258.3 million, up 0.2% over the previous month, in line with the national trend which rose by 0.6%. This maintains the steady upward movement in the State trend estimate since September 1995. In comparison with March 1995 the trend estimate is 16.4% higher for the State while the national figure is 14.9% higher.

**SECURED HOUSING FINANCE COMMITMENTS
TO INDIVIDUALS (ALL LENDERS)
(Excluding Alterations and Additions)
Monthly Total**

Total housing finance commitments (original figures including alterations and additions) increased by 8.0% to \$308.1 million compared with the previous month and was up 9.2% on March 1995. All the major categories, however, were down compared with March 1995 except refinancing, up 92.7%, and alterations and additions, up 8.7%. Refinancing increased by 14.9% to \$66.4 million during the month and alterations and additions was up 13.2% to \$23.3 million.

Finance commitments for construction of dwellings increased by 14.5% to \$31.9 million compared with the previous month but were 7.7% lower than March 1995. Finance commitments for the purchase of established dwellings, the largest category, were up 4.7% to \$173.8 million in March but down 2.0% compared with the previous March. Commitments for the purchase of newly erected dwellings decreased by 2.1% to \$12.8 million, down by 11.2% on March 1995.

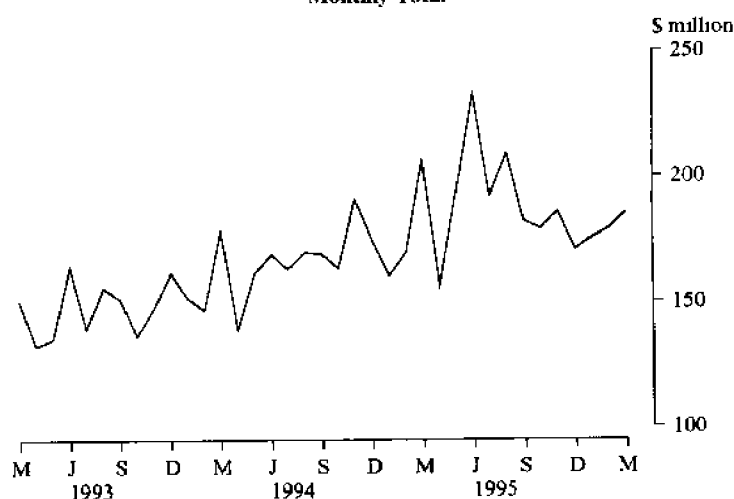

Personal Finance

Personal finance commitments increased by 3.8% to \$185.9 million during March 1996 compared with the national increase of 0.6%.

Fixed loan commitments increased by 6.7% to \$138.3 million, the highest monthly figure for twelve months. Refinancing again recorded a large increase, up 6.6% to \$30.8 million, 24.6% above the previous March and making it the highest month recorded. Major increases were also recorded for household and personal goods, up 54.1%, to exceed \$5 million for the first time, and new motor cars and station wagons which rose 3.9% to \$11.8 million, although this was well below (32.1%) the equivalent month last year.

Personal finance commitments under revolving credit facilities decreased by 3.9% to \$47.6 million during the month, 26.0% below March 1995. Secured personal finance commitments under revolving credit facilities decreased by 18.1% to \$16.6 million and unsecured increased 5.9% to \$31.0 million, both significantly below the previous March.

Monthly Total

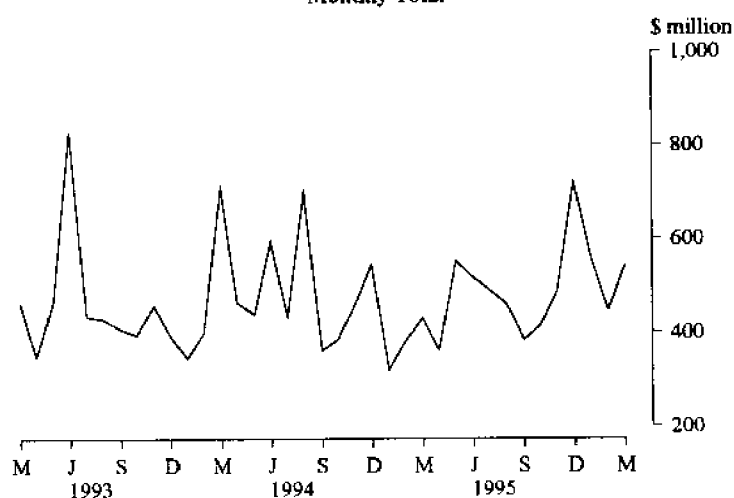

Commercial Finance

Commercial finance commitments increased by 21.3% to \$542.9 million when compared with February, 26.1% higher than March 1995. The corresponding Australian percentages were 14.7% and 22.9% respectively.

Commercial finance commitments under fixed loan facilities increased by 8.1% to \$343.3 million during March, 27.1% above March 1995. The main increases were for transport and storage and finance, investment and insurance, both of which doubled the previous months totals. Agriculture, forestry, fishing and hunting dropped 13.6% to \$47.4 million from the record February figure.

Revolving credit facilities increased by 53.5% to \$199.7 million following the low February total. The main increases were for manufacturing, up \$30.0 million and transport and storage up \$28.6 million after low figures in February. Wholesale trade recorded the main fall, down 32.1% to \$9.7 million.

**COMMERCIAL FINANCE COMMITMENTS
(SOUTH AUSTRALIA)
Monthly Total**

Lease Finance

The value of goods under new finance lease commitments increased during March by 8.4% to \$25.4 million, 21.9% above March 1995. This continued the upward trend following the very low January figure when the South Australian proportion of the national figure was down to 2.8%, compared with 3.9% in March.

New motor cars and station wagons not subject to depreciation, the largest category, increased by 33.5% to \$5.3 million following two low months but the recovery was still 22.7% below the previous March. Commitments for those subject to depreciation increased significantly during the month, up 34.4% to \$1.7 million which was double the previous March. Used motor cars and station wagons not subject to depreciation however fell 1.7% to \$2.3 million while those subject to depreciation were up significantly again after a low January.

Commitments for construction and earthmoving equipment reached \$5.5 million, the highest month since September 1990. The other major increase was for agricultural machinery and equipment which reached \$1.8 million. Electronic data processing equipment dropped by 36.5% to \$2.6 million after the high commitments in February.

Forward Outlook

Composite Leading Indicator

The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

In the December quarter 1995 :

- the experimental CLI fell 0.07%, the fifth consecutive fall since the September quarter 1994 peak. However the rate of fall eased from 0.29% in the September 1995 quarter.
- the last turning point in the CLI is coincident with the last turning point in the reference series (deviations in the trend growth rate of GDP(A) from its historical long-term trend).

The quarterly data are released in more detail in the *Australian Economic Indicators* (1350.0). The CLI was the topic of the Focus article in the September 1993 edition of *South Australian Economic Indicators* (1307.4).

Australian Business Expectations

Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided *qualitative* indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a *quantitative* indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in *Australian Business Expectations* (5250.0).

AUSTRALIAN BUSINESS EXPECTATIONS SOUTH AUSTRALIA AND AUSTRALIA SALES OF GOODS AND SERVICES EXPECTED PERCENTAGE AGGREGATE CHANGE

FOCUS

South Australian Agriculture

This article was contributed by Melinda Roberts, Australian Bureau of Statistics, Adelaide.

Introduction

South Australia contributes significantly to the agricultural commodity production of Australia. Preliminary figures for 1994-95 show South Australia as the major producer of barley with 45% of the total gross value. As well 45% of Australian vineyard area is located in South Australia. It is also a substantial producer of wheat, vegetables and orchard fruit.

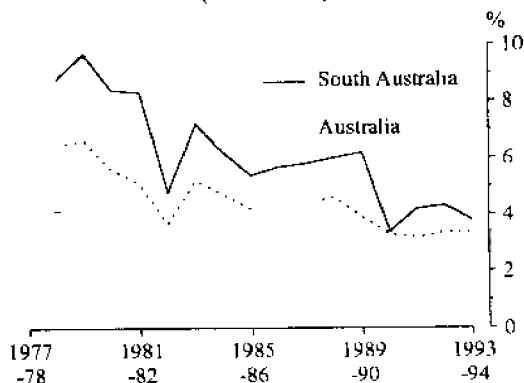

Contribution to Gross State Product and Gross Domestic Product

In 1993-94 agriculture contributed 4% to the Gross State Product (GSP) of South Australia and 3% to the Gross Domestic Product (GDP) of Australia.

In contrast to the manufacturing sector, which has remained markedly stable since the 1970s at around 18-20% of GSP, the agricultural sector has fluctuated as a percentage of GSP. It peaked at 10% in 1979-80 then declined to contribute approximately 4% during the early 1990s, falling to its lowest level in 1990-91 when it accounted for 3% of GSP.

Similarly, the contribution of the Australian agricultural sector to GDP has declined since the late 1970's. Agriculture during this period peaked in 1979-80 at 7% of GDP. It then gradually declined to approximately 3% during the 1990s. Thus the contribution of the agricultural sector has declined on both a State and national basis over the past twenty years. This suggests that the importance of the agricultural sector relative to the growing sectors of finance and insurance, and property and business services is diminishing.

CONTRIBUTION OF AGRICULTURE TO GSP AND GDP
(Factor Cost)

(a) includes forestry, fishing and hunting

Source: Australian National Accounts: State Accounts (5220.0)

Principal Components of the Agricultural Sector

The agricultural sector has two primary components; agriculture, and forestry, fishing and hunting. While agriculture is the larger component over the past two decades, the composition of these two components with respect to GSP has fluctuated.

In 1979-80 agriculture accounted for 94% of total gross value and forestry, fishing and hunting accounted for 6%. By 1993-94 the share from agriculture had fallen to 86% while forestry, fishing and hunting rose to 14% of the total gross value.

GROSS VALUE OF PRODUCTION

Period	Agriculture %	Forestry, fishing and hunting %
1979-80	94.0	6.0
1981-82	90.0	10.0
1983-84	92.0	8.0
1985-86	89.0	11.0
1987-88	93.0	7.0
1989-90	92.0	8.0
1991-92	92.0	8.0
1993-94	86.0	14.0

Exports

Two methods can be used to measure the value of agricultural exports. The *industry estimate* is derived by allocating SITC (Standard International Trade Classification) commodities to the industry of origin based upon the main economic activities of the industry with which the commodities are primarily associated. The *commodity estimate* is obtained by compiling those products which are considered to be primarily agricultural. In 1994-95 the industry estimate for the value of exports was \$606 million. The commodity estimate was \$1,196 million.

The two methods produce very different estimates for the value of agricultural exports. This is largely due to the fact that many products originating in the agricultural sector undergo further processing and as such are aligned to the manufacturing industry and not included in the agricultural industry estimate. These same products however, may be considered agricultural commodities and are therefore included in the commodity estimate.

An example of this is fruit juice. On an industry basis fruit juice is aligned to the manufacturing industry as further processing has occurred and is thus excluded from the agricultural industry estimate. However, fruit juice is considered to be an agricultural product and is therefore included in the commodity estimate.

The table below shows estimates of the value of agricultural exports on both a commodity and an industry basis

AGRICULTURAL EXPORTS

Year	Commodity estimate	Industry estimate
	\$ million	\$ million
1990-91	1,262	804
1991-92	1,432	882
1992-93	1,437	884
1993-94	1,357	732
1994-95	1,196	606

Source: International Merchandise Trade, Australia (5422.0)

The following table lists the principal agricultural commodities included in the commodity estimate.

VALUE OF PRINCIPAL COMMODITIES EXPORTED, 1994-95

	\$ million
Livestock products	16.7
Livestock slaughterings	325.0
Grain	221.4
Fruit and vegetables	123.1
Milk	1.7
Wool	287.0
Forestry	0.4
Fishing	190.7
Other	30.2
Total	1,196.2

Source: International Merchandise Trade, Australia (5422.0)

Employment

Since the mid 1960's employment within the South Australian agricultural sector has remained static, both as a percentage of the total number of persons employed within all industries, as well as the number of persons employed within the South Australian agricultural sector alone. For the period 1967-1995 employment has stabilised around a mean of 43,000 persons, and approximately 8% of total persons employed in all industries. Such stability illustrates a sector in the economy which is neither expanding nor contracting its employment levels.

In 1995, the South Australian agricultural industry employed 47,000 persons. Employment within the industry is predominantly male, accounting for approximately 70% of total employees. During the last thirty years the lowest number of persons employed within the agricultural industry was recorded in 1975 with only 37,000 persons employed.

EMPLOYMENT, 1967-1995

August	Persons employed	Agriculture etc. proportion of all industries
	no.	%
1967	44,000	9.7
1971	42,000	8.4
1975	37,000	6.7
1979	43,000	7.8
1983	44,000	8.2
1987	46,000	7.7
1991	42,000	6.7
1995	47,000	7.2

Source: The Labour Force, Australia (6203.0)

Gross Value of Selected Commodities

The total gross value of agricultural production (excluding forestry, fishing and hunting) in 1993-94 was \$2,271 million. Preliminary figures for 1994-95 show an increase of 11% to \$2,515 million.

CEREALS FOR GRAIN

Cereal crops are a major contributor to agriculture and in 1993-94 the gross value of crops was 29% of the total gross value of agricultural production. Preliminary figures for 1994-95 indicate that the gross value of cereal crops has decreased by 11% to \$586.7 million.

Wheat is grown in the Eyre Peninsula, Yorke Peninsula, Lower North, Murray Lands and the Northern Statistical Divisions. The production of wheat in 1993-94 was 2,114,000 tonnes, a decrease of approximately 13% since 1992-93. In 1993-94 the gross value of wheat for grain was \$365 million. Preliminary figures for 1994-95 indicate a further decrease of 15% to \$309 million.

Barley is grown in all States of Australia, with the majority of barley grown in South Australia in the Yorke Peninsula region. Barley is grown for the purpose of stock feed, malting and human consumption.

Production of barley in 1993-94 was 2,228,000 tonnes compared to 1,855,000 tonnes in 1992-93, an increase of approximately 20%, and 30% above the average production for the previous five years. The 1993-94 season saw a high proportion of malting quality barley in the crop (up to 50% of Australian Barley Board receivals). Preliminary figures for 1994-95 indicate that the gross value of barley for grain has declined 8% to \$251 million.

LIVESTOCK SLAUGHTERINGS AND PRODUCTS

Livestock slaughterings and livestock products each accounted for approximately 19% of the total gross value of agriculture in 1993-94. Preliminary figures for 1994-95, show that livestock products have increased in gross value by 23% to \$520 million. This was mainly due to an increase in the value of wool by 31% to \$356 million.

In 1994-95 livestock slaughterings rose by 14% to \$495 million with cattle and calves slaughterings rising by 29% to \$225 million and sheep and lamb slaughterings rising by 1% to \$122 million, when compared with 1993-94.

VEGETABLES

The principal vegetable growing area is based around the outskirts of Adelaide, providing easy access to the Adelaide Central Market. Other vegetable regions include the South East Division where predominantly potatoes are grown, and the River Murray region where potatoes, onions, carrots, tomatoes, pumpkins and rock melons are cultivated.

The gross value of South Australian vegetable production increased by 7% from \$178 million in 1992-93 to \$190 million in 1993-94. Expansion of vegetable plantings predominantly occurred in the Riverland, Mallee and South East, where low land costs, water and low overhead costs enabled these regions to be economically competitive with other vegetable producing districts in Australia¹.

The frozen carrot juice industry located in the Riverland is expanding as the markets in Japan and other South East Asian countries are developing.

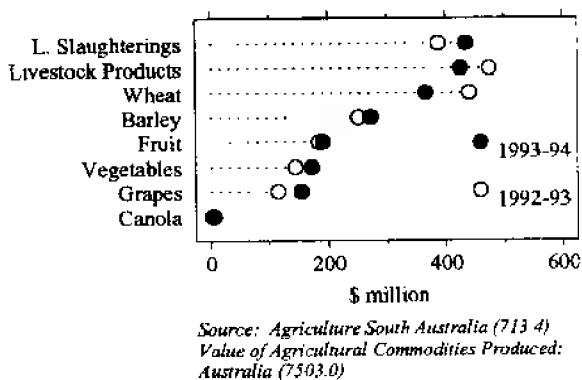

The possible development of a pipeline for reclaimed water distribution for the Northern Adelaide Plains will provide opportunities for expansion of vegetable production in that region¹.

FRUIT

A wide variety of fruit crops are grown in South Australia. The main types are oranges, peaches, and apricots (grown in the Riverland), and apples (grown in the Adelaide Hills). Throughout 1993-94 the South Australian apple industry continued its redevelopment of orchards, with the varieties of Royal Gala, Fuji and Pink Lady being the majority of new plantings. The planting of Jonathan trees continued to diminish, reflecting the low economic returns growers receive for this once popular variety¹.

With the exception of lemons and limes, all citrus fruits recorded an increase in gross value in 1993-94. The total gross value of citrus fruits was \$321 million. South Australia contributed 32% to the total value of citrus fruits produced in Australia. The gross value of strawberries in 1993-94 increased significantly (from \$6 million to \$8 million), in contrast to a 13% decline in the gross value of apricots and a 20% decline in the gross value of apples. While harvest conditions for stone fruits in 1993-94 were reasonable, crops were light. The gross value of stone fruits in 1993-94 was \$31 million a decrease of \$3 million from 1992-93.

GROSS VALUE OF SELECTED COMMODITIES

Emerging or developing crops and pastures

Low world prices for wheat during 1991 resulted in the need to develop alternative crops. One such crop is canola derived from rapeseed and grown as a substitute for sunflower oil used in margarine. The production of canola is a rapidly growing industry with the gross value of production doubling from \$3 million in 1992-93 to \$6 million in 1993-94. Further expansion of this crop is expected in future years.

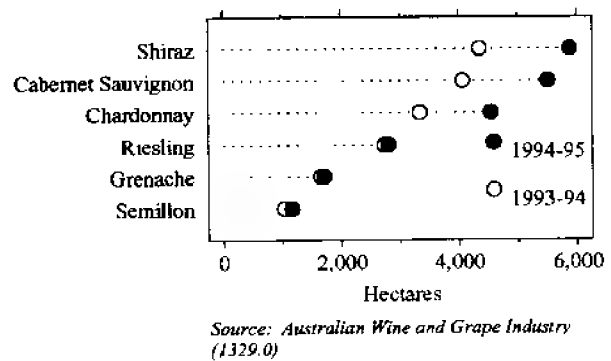

The South Australian grape growing industry is expanding with the industry accounting for 45% of the total grapes grown in Australia. In 1993-94 the gross value of grapes for South Australia increased by 34% to \$154 million. Preliminary figures for 1994-95 indicate a further increase of 76% to \$270 million.

The decrease in the area of vineyards during the 1980s has been reversed with major plantings in the

Adelaide Hills, Barossa Valley and South East regions over the last decade. In 1994-95 the area of vineyards was 32,358 hectares compared with 24,523 hectares in 1985-86.

In 1994-95 the area of Cabernet Sauvignon vines for harvest was 5,496 hectares, a 35% increase on 1993-94. Similarly, the area of Chardonnay vines for harvest increased by 36% from 3,340 hectares in 1993-94 to 4,542 hectares in 1994-95. Shiraz increased by 35% from 4,349 hectares in 1993-94 to 5,875 hectares in 1994-95.

AREA OF VINES AT HARVEST Selected Grape Varieties

Value of Agricultural Commodities Produced, South Australia (7503.4)

Year Book Australia (1301.0)

Livestock Products, Australia, February 1996 (7215.0)

Value of Principal Agricultural Commodities Produced, Australia, 1994-95 (7501.0)

South Australian Economic Indicators, April 1996 (1307.4)

These publications are available in ABS Libraries or by order from ABS Bookshops in all capital cities.

PC AUSSTATS

Online access to the latest statistical information from the ABS

The most accessible statistics in Australia . . .

With PC AUSSTATS, getting access to ABS information has never been easier.

Online, all the time . . .

You'll never be without vital information again. PC AUSSTATS will let you access the information you need, when you need it — 24 hours a day, 7 days a week.

You can connect to the ABS database and find the information you want, simply and quickly. And once you've selected the information, downloading to your PC is done for you by the PC AUSSTATS software.

Ready to go . . .

Once downloaded, the data is in .wks format — compatible with all the most common spreadsheet packages available today — so it's ready for instant analysis and manipulation on your own PC.

And with thousands of series covering the most important economic and social data, it's like having your own private ABS library — with librarian.

With the latest information . . .

By using PC AUSSTATS, you will know that you have the latest information available.

The main PC AUSSTATS database is updated daily, giving you full access to the latest facts and figures about the nation.

Plus, you don't have to worry about revisions or corrections to the data — the PC AUSSTATS database is updated in line with any revisions to our printed publications.

. . . and a historical perspective

The database that you access with PC AUSSTATS gives you time series data.

So you get not only the latest information, but also a historical perspective — and this gives you the base you need to perform your own trend analysis.

Historical information is typically available for a 15 year period for all series on PC AUSSTATS — and this includes monthly, quarterly, half yearly and yearly series.

Arrange a demonstration today . . .

For a demonstration of this powerful new information resource, call Graham Duncan on (08) 237 7609.

ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues on Tuesdays and Fridays a *Release Advice* (1105.0) which lists publications to be released within the next few days. The Catalogue and Publications Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the *ABS Publication Mailing Service* on 1800 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The *ABS Information Consultancy Service* has specialist staff to assist and advise clients with their statistical inquiries. For more detailed

information about these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide SA 5001.

The ABS also provides a *Statistical Consultancy Service*, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, telephone (08) 237 7379.
